6	Have the requisite quality control, quality assurance and continuous process improvement and training programmes been identified and are they in place?	
7	Is there a method to identify needed improvements?	

Item	X below if required	Description	Date Required	Production Dept.	Client Selection	Estimating/Sales Dept.	Date Completed	Lead Carp/PM initials to confirm completion
238		Confirm with plumber and production manager on site and in person that vinyl liners for shower benches, shelves etc... are properly installed and FULLY LAPPED over vinyl shower pan so any seepage runs into pan liner. PAY PARTICULAR ATTENTION TO CORNER DETAILS where vinyl laps over the edge of shelves and benches or turns a corner. Often the plumber will cut the vinyl at these points to make installation easier for him/her. Unless this is properly detailed with "Vinyl Corners" it will create an avenue for water leaks.						
239		Water-test every vinyl-lined shower bench and shampoo shelf. At a MINIMUM pour (3) 5 gallon buckets of water on every vinyl-lined bench and shelf. Be sure to sign your initials to confirm that you have completed this quality-control test and all benches and shelves are leak-free.						
240		After completing above, plug shower drains and fill shower pans with water for long-term multi-day leak test. Ask the production manager for the proper drain plug. DO NOT use a rag to plug the drain for this test.	This section of the checklist — items 238 through 242 — pertains to vinyl shower-pan liners. The lead carpenter is expected to perform these tests and inspections and confirm that he did so by writing the date and his initials in the far right-hand column. An earlier item reminds the lead to install blocking for the pans during the framing stage.					
241		NOTE: Do not fill shower pans at the end of the day or on the last workday of the week. Start test in the morning so if there are any severe leaks you will know about it by the end of the day and minimize potential damage in an occupied home.						
242		Do not allow anyone to stand or work in an unprotected shower pan at any time.
